Installation Instructions & Use Recommendations

FMS Accessories – KA3 Notepad Holder

These instructions must be read carefully and thoroughly **before** beginning work. FMS Solutions, LLC accepts no liability for damage caused by failure to observe the installation instructions or use recommendations.
Installation of this accessory does not change the factory specified load limits for the motorcycle.

Remove the storage box cover. Start by removing the two screws securing the cover shell. A T15 Torx driver is needed to remove the two screws.

Place a shop wrag over the cover near the steering head. When the cover pops-off, it may otherwise be scratched.

Lift the cover, press the latch into the opening, lift over the latch and push forward to release the cover from the front corner “pockets” where the under-shell attaches the cover.

Place the spacer over the cover as shown at right. You will use the spacer to mark the holes for drilling. It is often better to place a piece of masking tape between the spacer and the cover area where the holes will be drilled. This makes it easier to mark with a pencil.	
Drill the cover using a 1/8” drill bit (often used for pop rivets). Drill straight down through the cover.	
Place the spacer and notepad bale onto the cover. Insert the M3 x 12mm screws through the holes. If you were slightly “off” in drilling, you can fix it by lining up the holes and drill through again if needed.	
On the back side, add the body washers and M3 Nylock nuts. The M3 nuts take a 5mm driver / socket. Tighten the two screws snuggly. Remember, this is plastic, you don’t need to crank too hard on them.	
Prior to reassembly, ensure that the two springs loading the latch are in place. If not, ensure they are nested on their “pegs”.	
The photo at right shows the tab and mating “pocket”. Engage these first when reassembling.	

To reassembly the cover, you must first press the latch catches to the rear to “open” the latch as far as possible. This will enable the cover to drop over the latch. Then engage the cover “pockets” over the forward tabs, sliding back over the latch. Once over the latch, press down clearing the latch into the opening. You can let go of the catch below as the latch will protrude through the opening retaining the cover.	
Secure the two screws with the T15 Torx driver (don’t over-tighten).	
Insert supplied notepad under the bale. Congratualtions! The job is done!	

Feedback: Thank you for your purchase and we welcome your feedback as we too want to make every accessory exceed your expectations. Report any comments, suggestions, problems or concerns to FMS Solutions, LLC at info@fmsaccessories.com .

FMS Solutions, LLC Limited Warranty
FMS Solutions, LLC warrants to the first retail purchaser of new FMS Accessory products, to be free from defects in materials or workmanship, for a period of three (3) years from the original date of purchase as noted on the FMS Solutions, LLC invoice or original dealer invoice, except for paint and powder-coated finishes, which are warranted for the first 12 months only. LED lights from Feniex, Inc., Code 3, Inc. and Littlite are covered for 5 years by their manufacturer’s respective warranties – processed through FMS Solutions, LLC.

This warranty extends only to the FMS accessory and does not include: damage caused by accidents or abuse; incorrect installation; labor to diagnose, remove, repair or replace; any consequential damage or loss of use. Any FMS Accessory suspected of being defective should be returned to FMS Solutions, LLC along with a copy of proof of purchase and warranty request form available on the FMS website. FMS Solutions, LLC will determine if the FMS accessory has a warrantable defect, and if so, will repair or replace the item and return it to the sender without charge. The decision to repair or replace said item is solely the prerogative of FMS Solutions, LLC.

Note: Police motors can operate in a very rough environment since police motors are a “tool”. They can be dropped, knocked-over, etc. without concern as the officer has a job to do and determines what is necessary at any given moment. Warranty is for defects in materials or workmanship. Therefore, the ability of an item to become broken or damaged does not mean it is warranty … it just means it is broken or damaged and in need of repair or replacement. No manufacturer warrants their products to be indestructible. Any questions should be directed to info@fmsaccessories.com .
