

Installation Instructions & Use Recommendations

Rifle Dust Cover

These instructions must be read carefully and thoroughly **before** beginning work. FMS Solutions, LLC accepts no liability for damage caused by failure to observe the installation instructions or use recommendations.

Agencies have requested a cover designed to make exterior mounted rifles look less threatening to the general public and provides a level of dust and water protection at the same time.

The dust cover is designed to be easily removed for fast access to your rifle. The cover, made of rugged 1,000 denier ballistic nylon, is attached with two Velcro straps. The handy loop at the top makes removal quick by detaching the two Velcro straps and lifting the cover off the rifle. The cover was designed to fit rifles with carry handles / smaller optics.

Note that the cover only extends down to cover the forearm to avoid issues related to exhaust heat.

First!

Slide the cover over the collapsible stock and secure the dust cover routing the upper strap under the lock platform. This creates a “choke” point where the cover attachment is secure.

Second!

Route the lower strap under / around the lower mounting point. This location prevents the cover from coming loose yet is far enough away from the exhaust to ensure the cover is not damaged by exhaust heat. Be careful when installing on motors with hot a muffler.

Note: The cover is not locked to the rifle mount, so it could be stolen if a thief is bold enough. This compromise is made to ensure the officer has ultra-quick access to the rifle without removing any locks, etc. Do not fit any straps in the Santa Cruz gunlock as it likely will “load” the hasp, which will cause the lock release mechanism to malfunction.

FMS Solutions, LLC Limited Warranty

FMS Solutions, LLC warrants to the first retail purchaser of new FMS Accessory products, to be free from defects in materials or workmanship, for a period of three (3) years from the original date of purchase as noted on the FMS Solutions, LLC invoice or original dealer invoice, except for paint and powder-coated finishes, which are warranted for the first 12 months only. LED lights from Fenix, Inc., Code 3, Inc. and Littlite are covered for 5 years by their manufacturer's respective warranties – processed through FMS Solutions, LLC.

This warranty extends only to the FMS accessory and does not include: damage caused by accidents or abuse; incorrect installation; labor to diagnose, remove, repair or replace; any consequential damage or loss of use. Any FMS Accessory suspected of being defective should be returned to FMS Solutions, LLC along with a copy of proof of purchase and warranty request form available on the FMS website. FMS Solutions, LLC will determine if the FMS accessory has a warrantable defect, and if so, will repair or replace the item and return it to the sender without charge. The decision to repair or replace said item is solely the prerogative of FMS Solutions, LLC.

Note: Police motors can operate in a very rough environment since police motors are a "tool". They can be dropped, knocked-over, etc. without concern as the officer has a job to do and determines what is necessary at any given moment. Warranty is for defects in materials or workmanship. Therefore, the ability of an item to become broken or damaged does not mean it is warranty ... it just means it is broken or damaged and in need of repair or replacement. No manufacturer warrants their products to be indestructible. Any questions should be directed to info@fmsaccessories.com .
